

IX INTERNATIONAL CONGRESS
“LOW AND SUPERLOW FIELDS AND RADIATIONS IN BIOLOGY AND MEDICINE”
dedicated to the 300th anniversary of Russian Academy of Sciences

*Dedicated to the memory of its creator -
Lidia Nikolaevna Gall*

Dear Colleagues,
We invite you to take part in the IX International Congress “Low and super-low fields and radiation in biology and medicine”.

The congress topics cover a wide range of research at the intersection of physics, biology and chemistry, concerned to the study of physical factors impact on a biological object: “low” indicates something located near the detection limit of modern experimental methods, and “superlow” - beyond the capabilities of direct measurement.

Directions

1. Research, physical models and mechanisms of low factor action at molecular and cellular levels of the living system organization.
2. Low impacts at the organismal and population levels and the stability of life processes in the biosphere.
3. New non-medicinal technologies in medicine and veterinary.
4. Role of electromagnetic fields in the functioning of plants.

Format

The Congress is held in a hybrid format: in person and via videoconferencing.

Working languages of the Congress are Russian and English.

The authors of the best reports will receive an invitation to prepare scientific papers based on their materials in the journals “Agrophysics” and “Scientific Instrument Engineering”.
